MPal RESOURCES

Human-powered data for better AI

Data annotation, model evaluation and expert workforce solutions for AI teams.

www.mpalresources.com

Who we are

MPal Resources is a fully remote data services company headquartered in Bangladesh. We pair an in-house annotation platform with a trained workforce so AI startups and labs can get accurate, model-ready data without building the team themselves.

Built for small and mid-sized AI companies and research labs across Europe and the US.

98%+

accuracy on delivered datasets

100–500

trained annotators available

24 hours

to deploy at scale

What we do

Text & NLP Annotation

Classification, entities, intent, sentiment, summarization.

LLM Evaluation & RLHF

Response rating, ranking and preference data for model training.

Code Review & Annotation

Review of code and AI-generated code across languages.

Image & Video Annotation

Bounding boxes, segmentation, tracking and classification.

Audio & Speech

Transcription, speaker labeling and audio classification.

Multilingual Data

Annotation, translation checks and localization review.

Domain-Expert Annotation

Medical, engineering, finance, legal and more.

Content Moderation & Safety

Policy labeling and red-team testing for AI outputs.

Data Collection & Curation

Sourcing, cleaning and structuring datasets to spec.

Language and LLM data

Text & NLP

- Text classification
- Named entity recognition
- Intent and sentiment
- Summarization review

LLM Evaluation

- Side-by-side ranking
- Factuality and hallucination checks
- Rubric-based scoring
- Safety and red-teaming

RLHF & Preference Data

- Instruction-response writing
- Preference ranking
- Reward-model data
- Prompt and response QA

Code, vision and audio data

Code

- Review of AI-generated code
- Bug and security checks
- Code ranking and scoring
- Multi-language coverage

Image & Video

- Bounding boxes and polygons
- Semantic segmentation
- Object tracking
- Classification and QA

Audio & Speech

- Transcription
- Speaker labeling
- Audio classification
- Multilingual coverage

Domain expertise when you need it

Specialist annotators matched to your field, working to your guidelines.

Medical & Healthcare

Clinical text, medical imaging, health Q&A.

Engineering & Technical

Drawings, specifications, technical reasoning.

Finance

Documents, filings and financial Q&A.

Legal

Contract and case-text labeling.

STEM & Education

Math, science and problem verification.

E-commerce & Retail

Catalog, search relevance and product labeling.

Our annotation platform

Built in-house, built for quality

- Custom interfaces for text, image, audio and code tasks
- Role-based access and project management
- Multi-stage review and QA workflows
- Live progress and quality dashboards
- Exports in your pipeline's formats
- Use it with our team, or with yours

01 Ingest

02 Annotate

03 Review & QA

04 Deliver

A workforce ready within 24 hours

100–500

trained remote annotators

24 hours

from kickoff to deployment

Fully remote

operating from Bangladesh

How we scale

- Annotators trained on your guidelines
- Team leads and QA reviewers on every project
- Scale up or down as your needs change
- Shifts that overlap European and US hours
- Domain-matched teams for specialist work

Quality, security and price

98%+ accuracy

- Multi-stage review on every batch
- Calibration against your gold set
- Quality dashboards you can see

High data security

- Confidentiality-bound team
- Role-based, controlled access
- Your data stays yours

Competitive pricing

- Transparent, project-based quotes
- No hidden fees
- Costs stay predictable as you scale

Work with us your way

End-to-end data solution

We run setup, workforce, platform, QA and delivery.

Workforce solution

Our trained team works inside your tools and process.

Platform only

Our annotation platform for your own team.

Start with a pilot

Free demo runs of 100 to 1,000 data items. Judge our quality before you commit.
